

Discover Your Ideal Outdoor Recreation Experience: Share Your Needs with Us

A research study for people with a mobility impairment from a lower limb amputation

What is the study about?

We want to hear your thoughts & suggestions regarding current outdoor recreational activity to inform the creation of a novel program in partnership with RAD Society. Participation will take approximately 60 minutes.

We aim to help individuals with a mobility impairment lead an independent and active outdoor recreational lifestyle by providing adaptable equipment.

Primary Investigators:
Dr. Bill Miller
